

## Updating vaccination clinical decision support notifications in Allscripts Practice Fusion EHR

### Updating vaccination clinical decision support notifications to reflect GSK vaccines

The Centers for Disease Control and Prevention (CDC) publishes schedules for recommended vaccines appropriate to specific patients. The CDC schedule includes *universal recommendations*, meaning vaccines recommended for all patients of a certain age, and *risk-recommended vaccines* for those patients having certain conditions or specific health risks.

Allscripts Practice Fusion EHR provides preconfigured vaccination clinical decision support notifications, which are maintained and periodically updated by Allscripts EHR. The vaccination clinical decision support notifications are generally based upon the CDC *universal vaccine recommendations*. Some GSK vaccines are *risk-recommended vaccines* by the CDC and may not have associated vaccination clinical decision support notifications in Allscripts Practice Fusion EHR.

Vaccination clinical decision support notifications in Allscripts Practice Fusion EHR cannot be manually updated or edited by users. Users need to contact Allscripts Practice Fusion EHR customer support and request that the vaccination clinical decision support notification be added for a GSK vaccine.

### Benefits of updating vaccination clinical decision support notifications

Providers decide which vaccines to routinely administer to their patients, so it is important for the vaccination clinical decision support notifications within the EHR to match the practice's vaccine protocol. This helps ensure that patients are identified and prescribed appropriate vaccinations, including GSK vaccines with a *risk-based recommendation*.

*This guide provides a high-level overview on the use of vaccination clinical decision support notifications in the Allscripts Practice Fusion EHR, to reflect GSK vaccines. This overview is designed to provide guidance for you, your practice's EHR champion, or IT staff.*

*Please note that this guide was created based upon Allscripts Practice Fusion EHR version 3.7. Screens and features may change as new software versions are released.*

The information in this guide is subject to change without notice. GSK makes no claims or warranties about the applicability or appropriateness of this information.*

## Adding a vaccination clinical decision support notification

---

The vaccination clinical decision support notifications are part of the population health management program and are maintained and updated by Allscripts Practice Fusion EHR. The vaccination clinical decision support notifications are not able to be added to or edited by practices.

Therefore, it is important to contact Allscripts Practice Fusion EHR customer support to request to have a vaccination clinical decision support notification be added for a GSK vaccine. Allscripts Practice Fusion EHR can then work with their development team to have the notification added.
