GSK is dedicated to ensuring our customers have a positive experience with GSK vaccines.

We’ve created this resource that you and your staff can use for proper coding and reporting of GSK vaccines.

For more information, visit GSKVaccinesCodes.com to:

✔ Access product codes for GSK pediatric, adolescent, and adult vaccines
✔ Find common diagnosis and administration codes
✔ Explore the claims process as it relates to GSK vaccines
✔ Get information about special coding circumstances
✔ Find additional resources for your practice

For specific questions related to any GSK vaccine products, please refer to the full Prescribing Information for the product. GSKVaccinesCodes.com is not intended to serve as comprehensive training for medical billing and coding nor is it intended to direct the use of specific vaccine products for individual patients. Only a trained medical professional using professional judgment and clinical skills can make the informed decision about when to administer a specific vaccine to a particular patient.
Codes for GSK Vaccines
Codes are believed to be accurate as of the date of publication. Users should independently verify accuracy.
ICD-10-CM code Z23, Encounter for Immunization, is reported for all vaccines given within an encounter. Additional ICD-10-CM coding may be needed.
